TECHNICAL SKILLS

Programming Languages: C, C++, JavaScript (ES6+), TypeScript

Frontend: React.js, Next.js, HTML, CSS, Tailwind CSS, Material-UI

Performance & SEO: SSR, SSG, Code Splitting, Core Web Vitals, SEO Optimization

Backend & APIs: Node.js, Express.js, REST APIs

Databases: MongoDB, SQL, PostgreSQL

State Management: Redux Toolkit, React Query (TanstackQuery)

Tools: Git, GitHub, Docker, CI/CD

WORK EXPERIENCE

Driffle

SDE-1

Gurugram

March 2026 – Present

- Improved **Core Web Vitals**, raising performance score from **31 to 60+** by optimizing **SSR**, reducing **TTFB**, and improving **LCP** and **FCP** across high-traffic user flows.
- Integrated **AstroPay** payment gateway and **Top-Up** features serving users across multiple countries, handling end-to-end payment flows, secure API communication, and production issue resolution.
- Built **Support workflows** enabling wholesale sellers to directly manage refunds and product replacements, reducing support team intervention by **60%** and improving customer resolution time.

Gurugram

SDE-1 Intern

Oct 2025 – March 2026

- Contributed to **DAP** (Driffle Admin Portal) by implementing **e-commerce** features (pre-release game listings, assets uploads, scheduling), payment controls (transaction monitoring, gateway management), and marketing tools (dynamic promotional banners)—supporting workflows across **3+ teams**.
- Owned **seller-side** implementation for **BOOST** (gaming accounts marketplace), building account management, transaction history, and withdrawal workflows; optimized API performance using **TanStack Query** caching and request duplication, reducing API calls by **40%+** and improving dashboard responsiveness.
- Built and owned production-ready full-stack features contributing to scalable and maintainable architecture across multiple user-facing modules.

Punha

Frontend Developer Intern

Gwalior

Jan 2025 – Jun 2025

- Developed key features for two major products—Resworb (AI-powered browser) and Kaiga (custom-frame e-commerce platform)—using React.js, JavaScript (ES6+), Electron.js, and Tailwind CSS to deliver scalable and responsive user experiences.
- Optimized performance through lazy loading, code splitting, and efficient state management (Redux/Context API), reducing memory usage by 25% and improving app startup time by 30%.

PROJECTS

AI-LMS

Next.js, Node.js, Express.js, NeonDB, Inngest, ClerkAuth, GeminiAI

- Built an AI-powered Learning Management System (AI-LMS) using Next.js, implementing quizzes, notes, flashcards, chapter-wise content, a Q&A forum, and dynamic routing to create a scalable, interactive, and seamless learning platform.

EDUCATION

Institute Of Technology and Management [ITM] GOI

B.Tech in Information Technology [IT], CGPA: 7.37

Gwalior, MP

2021 – 2025

CODING COMPETITIONS & PLATFORMS

- Solved **300+** problems on **Leetcode**, spanning a wide range of data structures.
- Achieved Top 15% global ranking on LeetCode Max Rating: **1465**.
